Allowable Subject Matter

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance: prior art does not teach in combination with the other limitations of the independent claims a turboprop power plant having an inlet duct with two inlet branches, wherein the centroids of the inlet orifices of each branch and an apex coinciding with the shaft axis form an angle of less than 180 degrees. Note that claim 1 is broader than claim 12 that defines two branches more narrowly spaced. Patentable weight was given to the preamble of the independent claims because they breathe life and meaning into the claim, the turboprop engine being a distinct class of engines (see dictionary definition below).

Main Entry: turboprop engine

Function: *noun*

: a jet engine designed to produce thrust principally by means of a propeller driven by a turbine with additional thrust usually obtained by the rearward discharge of hot exhaust gases

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Michael 2788184, Laborie 5284012, Kotwal 5483791, Chamay 5725180, Kotwal 5483791, Flatman 4881367, Thompson 4930725, Giffin 5345760, Ray 4617028.
